

## Overview of Sport Premium Funding 2016 - 2017

The Sport premium funding has been given to every Primary school this year to improve provision in the following areas:

- 1) Achievement in weekly PE lessons.
- 2) Increased participation in competitive school sport.
- 3) Personal health and well-being.
- 4) Improved attitudes and behaviour towards learning.

This funding is ring-fenced and therefore can only be spent on provision of PE and sport in schools.

During the academic year 2016-2017, East Hanningfield C of E Primary plans to spend our funding (£8485) received in the following:

### Updating and expanding PE and sports equipment

After consultation with staff and children, we aim to buy additional equipment that will continue to aid high quality teaching and support a more sustainable PE curriculum. Our priority for the future continues to be the sustainability of our swimming pool as we need to ensure that every child in school can learn to swim competently, confidently and proficiently over a distance of 25 metres. All children need to swim a range of strokes and perform safe self-rescue before leaving East Hanningfield School. The aim is to replace and extend the equipment to enable children to swim for longer periods of time. We are aware of the need to improve and introduce new equipment to enable this valuable asset to be used by the current children and future children attending the school. We will measure the impact by monitoring the achievements and opportunities within swimming. We will ensure it is sustainable by ensuring they continue to swim a minimum of 16 weeks a year for the maximum amount of time.

### Specialist opportunities to inspire

We believe that children will lead healthy lives now, and in the future, if they are inspired and have a genuine understanding of the importance of eating healthily and staying active. We would

like to provide the children with visitors and trips that will engage and motivate them to lead healthy lifestyles. The school will be working with the Children's Health Project CIC which is a new initiative addressing four areas of health. Their vision is 'for all children to have greater respect for their bodies, the knowledge and confidence to make sustainable healthy choices and a true understanding of why it's important to be healthy'. It will involve health in four areas - movement, nutrition, lifestyle and mindset. It has been documented that pupils with better emotional wellbeing at aged seven had a value-added key stage 2 score 2.46 points higher than pupils with poorer emotional wellbeing. This will have an impact across the school now and in the future. By engaging the whole school there will also be opportunities for all children to engage in all four areas of health, including the least active. This project will also work with the parents and staff to ensure the whole school community benefits. We will measure the impact through progress and attainment. We will make this sustainable by ensuring all staff are involved in training and by working with the whole school community.

### **Employment of experienced and qualified sports coaches**

Employment of experienced and qualified sports coaches including an Active MDA, to work with Middays and Play Leaders to ensure the highest quality PE is being delivered in school during lunchtimes. All children including those who are unable to attend before and after school clubs and those who are at the moment less active at lunchtime will benefit from professional coaches leading activities lunchtime for them. We will measure the impact of this from recording the overall amount of time children spend being active. We will make this sustainable by Play Leaders and Middays being part of the activity and learning the skills for future cohorts.
